

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

# SCIENCE

A WEEKLY JOURNAL DEVOTED TO THE ADVANCEMENT OF SCIENCE, PUBLISHING THE  
OFFICIAL NOTICES AND PROCEEDINGS OF THE AMERICAN ASSOCIATION  
FOR THE ADVANCEMENT OF SCIENCE.

FRIDAY, NOVEMBER 10, 1905.

IRRIGATION.<sup>1</sup>

## CONTENTS.

<i>Irrigation</i> : COL. SIR C. SCOTT MONCRIEFF...	577
<i>The American Anthropological Association</i> : DR. GEORGE GRANT MACCURDY.....	591
<i>Scientific Books</i> :—	
<i>Gulick on Evolution, Racial and Habit- udinal</i> : PROFESSOR W. H. DALL. <i>Marcelli Nencki Opera Omnia</i> : PROFESSOR LAFAYETTE B. MENDEL. <i>Prost's Applied Chemical Analysis</i> : PROFESSOR JOSEPH W. RICHARDS. <i>Bourdeau on L'Histoire de l'habillement et de la parure</i> : O. T. M.....	598
<i>Scientific Journals and Articles</i> .....	596
<i>Societies and Academies</i> :—	
<i>The Elisha Mitchell Scientific Society</i> : ALVIN S. WHEELER.....	597
<i>Discussion and Correspondence</i> :—	
<i>Musical Instruments of Malaysia and the West Coast of America</i> : E. H. HAWLEY. <i>The Bureau of Soils</i> : ARTHUR JOHN HOP- KINS .....	597
<i>Special Articles</i> :—	
<i>The Method of Elimination in Fixing Generic Types in Zoological Nomenclature</i> : PRESIDENT DAVID STARR JORDAN. <i>An In- teresting Cretaceous Chimæroid Egg-Case</i> : DR. THEO. GILL. <i>Electrometer for the Stage of the Microscope</i> : PROFESSOR W. T. PORTER .....	598
<i>Quotations</i> :—	
<i>Research Work in Great Britain</i> .....	603
<i>Falls of Meteors</i> .....	604
<i>The Massachusetts Institute of Technology and Harvard University</i> .....	604
<i>Scientific Notes and News</i> .....	604
<i>University and Educational News</i> .....	608

SCIENCE has been defined as the medium through which the knowledge of the few can be rendered available to the many; and among the first to avail himself of this knowledge is the engineer. He has created a young science, the offspring, as it were, of the older sciences, for without them engineering could have no existence.

The astronomer, gazing through long ages at the heavens and laying down the courses of the stars, has taught the engineer where to find his place on the earth's surface.

The geologist has taught him where he may find the stones and the minerals which he requires, where he may count on firm rock beneath the soil to build on, where he may be certain he will find none.

The chemist has taught him of the subtle gases and fluids which fill all space, and has shown him how they may be transformed and transfused for his purposes.

The botanist has taught him the properties of all trees and plants, 'from the cedar tree that is in Lebanon even unto the hyssop that springeth out of the wall.'

And all this knowledge would be as nothing to the engineer had he not reaped the fruits of that most severe of all pure and noble sciences—the science of numbers and dimensions, of lines and curves and spaces, of surfaces and solids—the science of mathematics.

Were I to attempt in the course of a single address to touch on all the many

<sup>1</sup>Address of the president to the Engineering Section of the British Association for the Advancement of Science, South Africa, 1905.
